Page numbers followed by the letter n indicate entries in notes.

- absolute poverty 11, 11–14, 80
Acemoglu, Daron 31
Adams, Richard H. 110n
Afghanistan: in category of failed state 141; considered to be in critical condition 113; devastation by conflict 126; “Development Profile” 168–9; landlocked and resource-poor status 126; as not included in World Bank database 113; patterns of extreme poverty 112, 130–1
Africa 14, 84, 113–14; combined intervention scenario for 123–4; continuing relevance of \$1 per day measure 68; Dikhanov’s scenario for pro-poor growth 46; domestic inequality forecasts 62–3; geographical/regional perspective 114–16; health spending and burden of disease 92; IFs forecast of worsening income distributions 75; IFs population forecasts 58; importance of fertility reduction 104, 118; inadequate foreign aid for 99–100; need for governance to be addressed 141; percentage living on below \$1 per day 134; percentage living on below \$5 per day 67; performance on mortality rates 47; poverty factors in biggest regional populations 116–20; problems of conflict and corruption 41–2; regions and subregions 171; slippage in primary education completion rates 84; UN continental and regional/subregional grouping 87; UN ECAF review of progress toward MDGs 121–3; as unlikely to meet most of MDGs 141; World Bank economic growth forecasts for 61
Agarwal, Bina 3, 148
age, relevance to poverty rates 3, 138
agriculture: fall in share of GDP with average income increases 67; IFs module 52; marketing of surplus crops in China 128; population and demand for land 73; products embedded in environmental goods and services 147
Ahlwalia, Montek S. 13, 27–8, 34, 44, 74
AIDS see HIV/AIDS
air pollution 146, 148
Aitichison, J. 166
Akramov, Kamiljon 158
Albania 140
Alesina, Alberto 157–8, 158
Algeria 121, 122
Ali, Abdel Gadir 14
Alonso-Terme, Rosa 33–4, 156
Americas: geographical/regional perspective 132–6; percentage of people living on below \$1 per day 134; social stratifications affecting poverty 137–8, 141; as unlikely to meet poverty reduction MDG 141
Arab Human Development Report 2002 90
Archimedes 101
Argentina 83, 135, 136
Armenia 126
Aschauer, David A. 31
Asia: combined intervention scenario for 131–2; geographical/regional perspective 124–6; IFs forecast of poverty reduction 67; IFs population forecasts 58; low female-male ratio 3; overall success of fight against poverty 130; percentage of people living on below \$1 per day 134; regions and subregions 171; tiger economies 90, 98, 107; UN continental and regional/subregional grouping 87
Asia and the Pacific (IFs regional representation) 126, 130
Asian Development Bank 38, 100, 144
Australia 87, 126, 158
Australia-New Zealand (UN region) 172
avian flu 76
Baldacci, Emanuele 92
Balkans 140–1
Baltic republics 88, 138
Banerjee, Abhijit 21n
Bangladesh: considered to be in critical condition 113; feasible goal of income poverty reduction 128; high poverty headcount 126; numbers of people living below \$1 per day 112; trade openness 128
Barbados 63
Barney, Gerald O. 175
Barro, Robert J. 33, 68, 92
Bates, Robert H. 152
Becker, Gary S. 30, 32–3
Benhabib, Jess 30
Berthélemy, Jean-Claude 124
Bhalla, Surjit S. 19, 21n, 71n
Bils, Mark 30
Bloomberg, S. Brock 151
Bolivia 132, 135
Bolsa Escola (Brazil) 96
Bonfiglioli, Alessandra 37
Bosnia-Herzegovina 140, 142n
Bosworth, Barry 92
Botswana 116, 142n; good management of diamonds 114; improved governance after national plan 154–5; possibility of meeting first and second MDGs 121
Bourguignon, François 23, 24, 25, 26, 32, 175
“brain circulation” 42, 107
Brazil 64, 83; growth in labor force share 58; numbers of people living below \$1 per day 112; progress toward reaching MDGs 135; targeted conditional transfer programs 96
BRICS (Brazil, Russia, India, China) 58, 59, 61–2
Brown, James Allen C. 166
Burkina Faso 121, 124
Burma see Myanmar
Burnside, Craig 157, 158
Burundi 112, 113, 124
business cycles 59
Bussolo, Maurizio 62
Butler, Colin 148
Cambodia 112, 126
Cameroon 121
Canada 87, 132
capabilities: approach to poverty 1, 4, 5, 11, 14–17, 34, 47, 82–4; HDI measurement 123, 160; IFs approach to poverty levels 68–70; IFs goals for development of 50
Cape Verde 122
capital: different types 22, 29, 90–1; as domestic driver for economic growth 88; flight resulting from civil conflict 154
capital accumulation, effect of diminishing returns 28–30
carbon dioxide levels 147, 149, 150, see also greenhouse gases
Caribbean 132; danger of stagnation in poverty reduction 80; developing countries’ GDP per capita levels 82; domestic transfers 96; female share of official labor force 90; indigenous populations 136; interventions needed 109; outlook for poverty reduction 135–6, 136–7, 138; relationship between GDP and health spending 92; UN region 173; worker remittances 99
Carter, Michael R. 144
Carter, Nicholas 13, 27–8, 34, 44, 74
Caucasus 126
Caucutt, Elizabeth M. 32, 33
Central Africa see Middle Africa
Central African Republic 112, 113
Central America 132; countries 173; domestic transfers 96; high poverty rates in indigenous populations 136; increase in education spending 91; outlook for progress in poverty reduction 135–6, 136–7, 138; relationship between GDP and health spending 92; rise in female share of labor force 90; rise in savings and investment rates 90; worker remittances 99
Central Asia 124; developing countries’ GDP per capita levels 82; developing countries’ progress in reducing poverty 81; interventions needed 110; Islamist cause 153; oil and natural gas resources 126
Chen, Derek 92
Chen, Shaohua 19, 26
Chenery, Hollis 13, 27–8, 34, 44, 67, 74, 87
Chetwynd, Eric 156
children: environmental risks 146, 148, see also infant mortality
Chile 132, 135, 137
China: approaches to global inequality in 63; different poverty forecasts of World Bank and IFs 66; female share of official labor force 89; Goldman Sachs economic growth forecasts 61; high savings and investment rates 90; interventions in economic growth forecasts for 74; investment in human capital 91; labor force 58; numbers of people living below \$1 per day 112; ongoing rapid economic growth 59, 60, 64, 124; poverty headcount 34, 126; push for access to raw materials in Africa 120; rapid reduction in poverty 2, 3, 121, 126; scenario of reversal of economic growth 131–2; significance in influencing global poverty reduction 76, 77, 84, 161; success in governance aiding poverty reduction 126–8, 141; sudden rise in economy in 1980s and 1990s 6; suggested overreporting of growth rates 19; in UN regional grouping of Eastern Asia 87; World Bank poverty headcounts 48
chronic poverty 16, 111, 153, 161
civil conflicts 120, 151, 153
class/caste, as factor in poverty rates 161, 165
Clemens, Michael A. 122–3
climate change 146, 147

coastal states, Africa 115–16
 Collier, Paul 106, 114–15, 119, 126, 157, 158; examination of civil conflicts 151, 152, 153–4, 154–5, 155
 Collins, Susan M. 92
 Colombia 132, 135
 colonial legacy: Democratic Republic of the Congo 120; Latin America 141
 computer simulation modeling, IFs 44, 50
 conflict: Asian countries affected by 126, 131; faced by Ethiopia 119; following breakdown of former Yugoslavia 140; influence on poverty 143–4, 153–4; influence of poverty on 151–2; nonpoverty determinants 152–3; omission from IFs analysis 155; policies to reduce risk of 154–5; relationship with poverty 150–1; simmering in African countries 141; “trap” of stagnation from cycles of 154
 conflict resolution 150
 Consultative Group on International Agriculture Research (CGIAR) 100
 consumption: changes in distribution affecting poverty numbers 26–7; inequality represented by Lorenz curve 23–6; LINKAGE model forecasts 48; measurement in national accounts 19, 20; measures of poverty based on 5, 11, 17
 continental perspectives 4, 112; use of World Bank set of regions 87
 corruption: caused by poverty 157; causing poverty 156–7; in failed states 113; in governance 92, 93, 107, 127, 156; and increase in inequalities 33–4; Nigeria’s problems 117; opposing effects of foreign aid on 100, 157–8; as plague in Africa 141; reduction of 102, 108, 108–9; Sierra Leone 155; supported by natural resources 115
 Corvalán, Carlos 146
 Costa Rica 132
 Côte d’Ivoire 124, 153
 country-specific perspectives 4, 87, 111–12; on poverty reduction and environment 144; and tailoring interventions 161; WHO publications on burden of disease 146
 Croatia 140
 cultural factors: patterns defining social capital 92; in poverty-environment relationship 145, 149
 Dahlman, Carl 92
 Daily, Gretchen C. 145
 Datt, Gaurav 13, 14, 26
 Davis, Kermal 144
 Davoodi, Hamid 33–4, 156, 159n
 Deaton, Angus 19, 19–20, 21n
 debt relief: Central America and Caribbean 132, 136; tied to poverty reduction strategy 158; World Bank’s policies regarding 36
 Delamonica, Enrique 105, 110n
 democracy 152, 154, 158
 Democratic Republic of the Congo (DRC) 114, 116; considered to be in critical condition 113; factors shaping prospects for poverty reduction 120, 121; as not included in World Bank database 113; patterns of extreme poverty 112
 Deng Xiaoping 128
 density curve 24
 deprivation: human poverty index 15, 69; and income 70
 developing countries: female share of official labor force 89; impact of oil prices 80; implications of poverty reductions 85; income-based measurement 14; progress in primary education completion rates 123; representation in economic model for poverty analysis 49–50; rise in human development index 69; underdeveloped infrastructures 94; urban populations 3; World Bank set of regions 79, 80, 87
 development agencies, Poverty-Environment Partnership 144
 Dikhanov, Yuri 46, 65
 Dimaranan, Betina 175
 disasters 148
 disease: Africa’s burden 92; caused by war and conflict 153, 154; environmental burden 146
 displacement of people 120, 153
 Djibouti 113
 Doha round (World Trade Organization) 98
 Dollar, David 26, 157, 158
 domestic drivers and levers 88–96, 101, 102–4
 domestic inequality 62–3
 domestic self-help 107, 108, 156
 domestic transfers 96, 102–3, 161
 Dominican Republic 132
 drought 119
 Dufo, Ester 21n
 Dugan, Laura 152
 Durning, Alan B. 144
 East African Federation 124
 East Asia 124; domestic transfers 96; IFs forecast of poverty levels 68; interventions needed in poor countries 109; poor countries’ low education spending 91; progress in poverty reduction 2, 68; rise in human development index 69; successful export-led economic growth 41–2, 98; UN and IFs regional groupings for 87; UNDP forecasts for poverty reduction 46
 Easterly, William 30, 91, 100, 157
 Eastern Africa 114; domestic transfers 96; failure to reduce fertility rate 88; increase in education spending 91; interventions needed 109; rise in savings and investment rates 90; UN region 171; weakness of infrastructure 94
 Eastern Asia (UN region), countries 171
 Eastern Europe 14; combined intervention scenario 140–1; improvement regarding corruption 93, 157; increase in education spending 91; increased savings and investment rates 90; interventions needed 110; recovery from economic shock after end of communism 140, 142; relationship between GDP and health spending 92; UN region of 138, 172
 Eberlei, Walter 158
EcoHealth (journal) 148
 economic development: absence/failure as root cause of conflict 151; causing resource and capability constraints 88; relationship with health spending 92
 economic distribution: deep drivers 169–70; as domestic driver for growth 88, 96; in forecasting model 49; IFs forecasts 62–5, 74–5; indirect changes effected by human action 72; potential changes due to environmental factors 148; structural problem in Southern Africa 88
 economic freedom/liberalization: China 127, 128, 141, 161; lack of data for Afghanistan 168–9; need for increase in 108, 156; and social capital/governance 92, 93, 168–9; underperformance of regions 88
 economic growth: adverse effects of conflict 153; China’s achievement in accelerating 128; connections with inequality and poverty 23–6, 146; debilitating effect of corruption 156; deep drivers 28–32, 89, 168–9; as driver of income poverty 22; effect of population rates 73; enhancement by domestic leverage 88; in forecasting model 49; GEO scenarios addressing 78; global “Golden Age” 59, 74; IFs forecasts 59–62; and IFs population forecasts 58, 68; imagining future reversal of 76; influence of human capital 146; interventions to create high and low forecasts 74; low per capita rates in Latin America and Caribbean 80; Millennium Project’s elaboration of causal drivers 49; negative connection with natural resources 31; recent acceleration in Africa 124; shifting of distribution effects 26–7; supportive interventions 106; trade-offs with poverty reduction 23; in World Bank’s approach to poverty 35, 36, 37–8
 economic shocks 155
 economies: “Dutch disease” 31, 100, 105, 156; IFs module 51; impact of HIV/AIDS 119
 ecosystem services 145–6
 Ecuador 132, 135
 education: in capabilities approach to poverty 11, 16; decline of completion rate in sub-Saharan Africa 121; effect of higher population on expenditures for 73; emphasis of UN Millennium Project 39; enrollment rates as HDI indicator 69, 82, 84; in estimates of skilled and unskilled households 170; human capital 91–2; IFs figures for levels of 68–9; IFs module 51–2; impact on fertility 106; and improved productivity in Americas 138; increasing family spending on 22, 91–2, 106, 108; inequalities 33; leading to better health 23; Millennium Development Goal (MDG) for 121–3, 162; rise in primary education completion rates 67; subsidy 22–3; underperformance of Afghanistan 168; underperformance in spending on 88; World Bank forecasts of primary school enrollment 47
 Egypt 121
 El Salvador 132, 136, 137
 endogenous growth theory 49
 energy: goods and services as factors of products/production 147; IFs module 52; natural capital 95; outlook for Nigeria 117; Shell International’s use of growth scenarios 61
 energy demand, pressure on environment 149, 150
 energy prices 61
 environment: in IFs goals for sustainability 50; investment and protection for poverty reduction 143–4; need for attention in analysis of future poverty levels 148–50; relationships with poverty 9, 144–6; scenarios devised by Global Scenario Group 78
 environmental goods and services 145–6; as general factors of production 147–8; impacts on health 146–7; as products/components of products 147; role in issues of inequality 148
 environmental resources: IFs module 52; natural capital 94; unequal and insecure access to 148, *see also* natural resources
 equilibrium economics 18, 49, 168
 Eritrea, as not included in World Bank database 112, 113, 116, 119
 Esman, Milton 152
 Ethiopia 114; considered to be in critical condition 113; discovery of natural gas resources 117; factors in prospects for poverty reduction 119–20, 121; low level of human development 116; patterns of extreme poverty 112
 ethnic conflict 152; Sierra Leone 155
 ethnic differences 3, 161, 165
 Europe: convergence with US in productivity levels 61; developing countries’ GDP per capita 82; developing countries’ progress in poverty reduction 81; female-male ratio 3; geographical/regional perspective 138–40; poverty at moderate levels 142; problems of unemployment 16; UN continental grouping 87; UN regions and subregions 172
 European Union 68, 140
 export promotion 42, 98, 107
 external assistance 42
 external orientation, policy approaches 23
 extrapolation 43, 45–6
 extreme poverty 13, 76, 81–2; Africa as having greatest number of countries in 114; Asian regions 126, 130; combined scenario for reducing 104; concentration in Indian Peninsula 126–6; country-specific patterns of 112–14; GDP per capita for disappearance of 88; Middle India 129; numbers lifted out by poverty reductions of 2–3 per cent 85; poor outlook for Afghanistan and Pakistan 131
 failed states/state failure 113, 131, 141; and domestic conflict 150, 152
 family planning 89, 110n
 Fearon, James 159n
 fertility: downward trend in Nigeria 118; effect on labor supply 169; effect on population growth 32, 32–3, 88–9; fall with countries’ average income increases 67; and health 146; in IFs population forecasts 57, 58, 73; impact of education on 106; importance of reduction in Africa 104; intervention for reducing 102
 FGT (Foster, Greer, and Thorbecke) poverty measures 12–13
 Fields, Gary 11, 26
 Firebaugh, Glenn 64
 Fitzgerald, V. 154
 food: decreases in production caused by war 153; impact of environmental change on availability 147; provision of direct assistance to the poor 104
 forecasting 11, 43–4, 101; limitations 48–9, 102; methodology of IFs 20–1, 70; model structure and capabilities 49–50; pathbreaking ACC model 44–5, 74; uncertainties 161–2
 foreign aid: for development and poverty reduction 99–100, 106, 107; and

“Dutch disease” 100, 105; economic effects 156; increasing 22, 42, 102, 105; influence on governance and corruption 157–8; Millennium Project’s emphasis on 106; need for timing to help recovery from conflict 155; rebels’ appropriation of 152; World Bank’s policies regarding 36
 foreign assistance 107–8, 155
 foreign direct investment 97, 106, 169; China’s taxes on 128; encouragement for 42, 107; enhancing technology flows 101; global increase needed 108
Foreign Policy magazine 113
 forest areas 149, 150
 fossil fuel resources 149
 Foster, James *see* FGT family of poverty measures
 France 138
 Fraser Institute 108, 128
 Fuhrmann, Bettina 158
 Fukuda-Parr, Sakiko 15
 functionalities: distinction with capabilities 15; in forecasting 47, 160; link with poverty made by HPI 69, 160
 The Fund for Peace 113

 Gabon 122
 Gallup, John Luke 146
 Galor, Oded 33
 Gambia 13
 Gatune, Julius 114
 GDP (gross domestic product): IFs forecasts for per capita growth 59; IFs forecasts on poverty rates 74; increase leading to fall in corruption 157; LINKAGE model forecasts 48; per capita rate growth in China and India 131; poverty in regions as function of 87–8; rankings in HPI 15–16; in regional income poverty calculations 82–4; relationship with fertility 88; relationship with health and education spending 92, 106; representation in IFs economic model 168; and risk of experiencing civil conflict 151; World Bank’s analysis of effect of remittances on 48
 gender equity: low level in Middle India 129; progress in education in Africa 121
 gender inequality/discrimination 3, 17, 33; Latin America 138
 geographical factors, in economic model for poverty trends 49–50
 Germany 99, 138
 Ghana 17–18, 18, 142n; patterns of extreme poverty 112; possibility of meeting first MDG 121; potential to become emerging country 124; risk of conflict 151
 Gini coefficient 23, 62, 169–70
 Glaeser, Edward L. 31
